Multi-Dynamic **NECKREST**

CATCH

Multi-Dynamic NECKREST

Help to relax tired neck

Catch your neck when sited

When you are sitting, according to body recline force, ioo's neckrest could automatically adjust to the best forward and backward position, provide your neck full support.

Catch your neck when your body make big movements

When your head make parallel move ments, the Neckrest's innovative flex tension allowsto provide multi dynamic support without giving any pressure to the neck region.

Catch your neck when you recline.

When you on recline position, the Neckrest will increase its flexible angle, and able to automatically adjust the height, provide the best comfortable neck support.

ONE

SINGLE Lever Control

Operate more simply and intuitively

To adjust all functions just in one point of control.

Pull up to adjust seat height

Push forward to adjust seat slide

Pull backward to adjust angle of the back

Nature position to lock seat slide, seat up & down and angle of the back

SUPPORT

3D Lumbar Support

SUPPORT

3D Lumbar Support

SUPPORT

3D Lumbar Support

Provides full support to the lumbar region

Support your back when you sit

When you are sitting, the lumbar will automatically adjust the backward position, and allow your lumbar and back to have best support.

Support your back when you make movements

when your body change position, the 3D lumbar will make forward& backward and side movements according to our body movement. Provide multi directional support to your lumbar.
